Introduction

Province of Saskatchewan 2026-27 Estimates

Introduction

General Principles

Introduction to Budget Documents

On budget day, the Minister of Finance tables the provincial Budget and the expenditure Estimates.

The Budget includes an overview of the financial plan for the Government of Saskatchewan reporting entity, which is comprised of core government operations funded through the General Revenue Fund (GRF) and all other entities which the Government controls according to Canadian Public Sector Accounting Board (PSAB) standards.

The expenditure Estimates represent the Government's detailed GRF expenditure plan presented to the Legislative Assembly for the fiscal year commencing April 1 and ending March 31.

Appropriations are amounts the Legislative Assembly authorizes to be paid from the GRF under an act of the Legislative Assembly for a particular purpose.

The GRF is the central accounting entity into which all public monies are deposited and from which they are disbursed. Exceptions must be authorized by law.

The Financial Administration Act, 1993 requires that the Estimates contain any expenditures the government plans or is committed to make from the GRF in the fiscal year. The Estimates also provide information regarding advances, loans and investments. Additional information may be included, at Treasury Board's direction, to assist the Members of the Legislative Assembly in reviewing the Estimates.

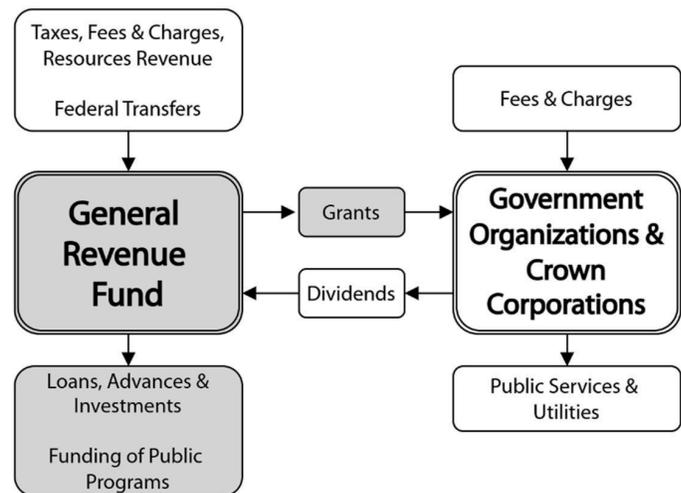

Estimates Structure

Budgetary and Non-Budgetary Expenditures

The expenditures in the Estimates are either budgetary or non-budgetary. Budgetary expenditures increase recorded expenses either in the current fiscal year or, as in the case of expenditures on tangible capital assets, over a period longer than a fiscal year. Non-budgetary expenditures are expenditures for loans, investments and advances and are never recorded as expense.

Voted and Statutory Approval

An appropriation act is a supply bill passed by the Legislative Assembly. It is the legal authorization to spend funds for specific purposes as outlined in the Estimates. Appropriation acts create "voted" appropriations that cover a period typically ending March 31 of the fiscal year in which the appropriation is requested and approved. A statutory approval is an ongoing spending authority provided through legislation (statute). Statutory approvals do not expire. Both types of approvals are included in the Estimates.

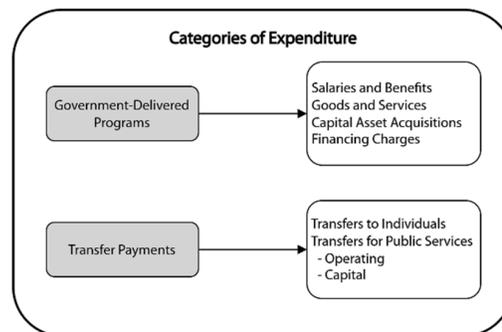

The Estimates include appropriations for the shaded transactions.

Categories of Expenditure

Budgetary expenditures are separated into two main categories: government-delivered programs and transfer payments.

Government-delivered programs are further separated into salaries and benefits, goods and services, capital asset acquisitions and financing charges. Transfers are separated into two main categories: transfers to individuals and transfers for public services. Transfers for public services are further separated into operating and capital transfers.

Votes, Subvotes and Allocations

The Estimates are divided into votes, subvotes and allocations. The government generally assigns major program areas and the associated enabling legislation to a minister. The minister heads a ministry that delivers the related programs and services, and is typically assigned a single vote for all budgetary appropriation. The vote may be divided into subvotes that comprise the ministry's major programs or functional areas. Subvotes can be further split into allocations that provide additional detail about the nature of the proposed expenditures. A ministry's non-budgetary appropriation is reported in a separate vote.

Separate votes may also be used for transfers to Treasury Board Crown corporations and agencies.

The following is an example of vote, subvote and allocation.

- Vote 32 Health (vote)
 - HE04 Provincial Health Services and Support (subvote)
 - Canadian Blood Services (allocation)

The Legislative Assembly approves appropriations at the subvote level. The subvote name, description and allocations tell the Legislative Assembly either the purpose of the planned expenditure or the recipient to whom it will be paid. The subvote name and description, along with the ministry's legislation, provide legal authority for payments from the approved appropriation.

Approval Process – Voted Estimates

Expenditure Estimates requested by ministries and agencies are reviewed by Treasury Board and approved by Cabinet. The Estimates requested by the Legislative Assembly and its Officers, except for the Provincial Auditor's requested Estimates, are reviewed and approved by the Board of Internal Economy. The Provincial Auditor's requested Estimates are approved by the Public Accounts Committee. Once approved by the appropriate board or committee, Estimates are then presented by the Minister of Finance to the Legislative Assembly for final review and approval.

The Legislative Assembly refers Executive Government's Estimates to one of four policy field committees for review and refers Estimates of the Legislative Assembly and its Officers to the Standing Committee on House Services. Once the reviews are complete, the committees vote and report the Estimates. The Legislative Assembly then approves the Appropriation Bill. Additional information can be found on the Legislative Assembly's website under Legislative Committees (www.legassembly.sk.ca).

Budget and Spending Control

The Financial Administration Act, 1993 authorizes the Minister of Finance to move (vire) unexpended and uncommitted funds from one subvote to another within a vote. This movement of funds is a virement.

The movement of monies from one vote to another is not allowed. Ministries are required to deliver their programming within their approved appropriations. Ministries must administer the funds allocated to them for the purposes outlined in the Estimates and in accordance with legislative authority and administrative policy. If the amounts appropriated are insufficient, additional appropriations must be obtained either through Supplementary Estimates or special warrants signed by the Lieutenant Governor in Council. Special warrants can only be approved when the Legislative Assembly is not in session.

The Provincial Comptroller provides appropriation control to ensure ministries do not overspend their appropriations. The Provincial Comptroller is also responsible for verifying that expenditures comply with legislation and administrative policy.

Budget Principles

Net Budgeting

Subject to Lieutenant Governor in Council approval, *The Financial Administration Act, 1993* allows net budgeting for commercial activities which produce revenue. These activities are displayed on a gross basis, but are netted against the external recovery when determining the voted appropriation.

Gross Budgeting

The Estimates reflect the gross cost of all other programs. Revenue attributable to a program is not netted against the program expenditures. Exceptions to the gross budgeting principle are provided only by legislation.

Shared Services

Legislation authorizes central ministries and agencies, such as the Public Service Commission, to provide administrative services to other ministries at no cost to the client ministry.

Pursuant to Section 33.1 of *The Financial Administration Act, 1993*, any ministry may enter into a shared services agreement with another ministry to provide services the receiving ministry requires to perform its functions and achieve its objectives and purposes. The providing ministry may charge the receiving ministry on a cost-recovery basis. The appropriation is provided to the receiving ministry, which reimburses the providing ministry, for the cost of services.

Restatements

When a function or program that is significant to the ministry's overall budget is moved either within the ministry or to another ministry, the prior year's Estimate is restated to reflect the reorganization and provide the Legislative Assembly with comparable information on the cost of programs and services in the previous year. Where there has been a change in how a service or program is provided, rather than a movement of the program or service, amounts are not restated. Reorganizations from or to Executive Government are not restated. When it is not possible or practical to restate, an explanatory note is provided.

Prior Year Comparative Information

Estimates disclosed for the prior year are the amounts that were requested in the prior year's Main Estimates and Further Estimates, if any. Any amounts requested through Supplementary Estimates after the passage of the prior year's main appropriation bill are excluded.

Forecasted expenditures disclosed for the prior year are the forecasted year-end expenditure totals developed at the end of government's third quarter (December 31).

Restatement Schedule

2025-26 Appropriation

Restatement

Each year there may be some form of government reorganization. These reorganizations may include:

- creation of new ministries or disestablishment of existing ministries;
- transfer of a program or function from one ministry to another; and
- transfer of a program area or function (subvote or allocation) within a ministry.

To improve comparability, a restatement of the prior year's Estimate is presented. A restatement ensures that the prior year's funding associated with an activity or program is placed in the same ministry or subvote that will be performing that function in the current year.

The "Restatement Schedule" indicates the functions that were transferred into or out of a particular vote to arrive at the 2025-26 Estimate as it appears in the 2026-27 Estimates.

Occasionally, ministries may transfer functions within a vote from one subvote to another, or one allocation to another within a subvote. In these instances, the affected lines are restated and, if significant, an explanatory note is provided within the restatement schedule.
